Date Initiated: 10/3/2018

## Case Predication

On October 3, 2018, Jack Dolan, Esq., of York Dolan Law, contacted Rehmann Corporate Investigative Services ("Rehmann CIS") to request an investigation into Clinton Township's Department of Planning and Community Development ("DPCD").

Dean Reynolds, former Clinton Township Trustee, has been indicted and convicted by the United States Attorney for the Eastern District of Michigan subsequent to investigation by the FBI. During trial, testimony was received from Mr. Paulin Modi, an executive with Giffels Webster, a local civil engineering firm, and Mr. Carlo Santia, previously employed as the Director of the DPCD for Clinton Township. Both individuals provided information during testimony indicating Mr. Reynolds had inappropriately received funds from Giffels Webster, allegedly in a scheme to show favoritism to certain vendors. Upon review of this testimony, specifically that of Santia, concern remained that other individuals in Clinton Township may have known about the scheme. Review was requested in an effort to determine if Clinton Township may have been otherwise harmed by Reynolds' actions, or if there may have possibly been others involved in improper solicitation of vendors. The Township sought an investigative firm to research and provide evidence resolving these outstanding concerns.

## Executive Summary

Informal contact was made with the Special Agents of the FBI involved in the Reynolds investigation. No request was made of them which would improperly divulge sensitive information. The purpose of this contact was to gain assurances this independent investigation would not cause the FBI discomfort or in any way impede any ongoing investigations. Assurances were received this would not be the case.

An interview was conducted of Ms. Carol Sobosky in an effort to gain additional facts regarding the proper operation of the DPCD. Rehmann CIS was provided a listing of all requests presented to the DPCD from the period 2013 onward, all existent under the term of Santia as Director. This listing of applications included site plans, revised site plans, zoning map and text amendments, and special land use requests. A copy of the list of applications is included in this report as **Exhibit A**.

Subsequent to review of the list of applications, a request was made by Rehmann CIS for the complete files and corresponding documents regarding certain applications to be made available. Rehmann CIS focused on the applications for which Santia may have had some degree of input and control, specifically zoning amendment requests, special land use requests and amendments. A complete review of the Clinton Township files containing these applications, correspondent Board action and resulting activity was then conducted. There was nothing detected from this review which caused the investigator concern or appeared to expose Clinton Township due to improper activity.

Subsequent to this documentary review, contact was made with select applicants in an effort to gain their possible insight into the operations of the DPCD, and Mr. Santia in particular. These direct interviews similarly failed to develop negative information on the operation of DPCD or Mr. Santia. These interviews are not fully documented in this report, but are merely summarized in an effort to protect the confidentiality of the interviewees.

During the document review and interviews, some investigative focus was placed on those requests for which Mr. Santia recommended a traffic survey be conducted. Given Mr. Santia's conflicted

involvement in a traffic study firm (TEC), efforts were made to determine if he directed applicants to utilize this firm in their effort to be compliant with Clinton Township rules and recommendations. In no instance was this found to be the case. Interviewees were consistently ignorant of Mr. Santia's involvement in such a firm. Still, Mr. Santia's involvement fits within the definition of a conflict of interest, and recommendations are offered later in this report to consider and review policy on such conflicts.

Contact was made with Mr. William Smith, Human Resource ("HR") Director, Clinton Township. Smith indicated he first became aware of Mr. Santia's involvement in a traffic study firm subsequent to Santia's testimony in the Reynolds matter. Smith noted the collective bargaining agreement between the Charter Township of Clinton and the local chapter of AFSCME (the union) states as follows:

#### Section 7. EMPLOYEE CONFLICT OF INTEREST

*In recognition that a conflict of interest may arise, it is mutually agreed that an employee covered by this Agreement shall not engage, directly or indirectly, in any work as an employee, independent contractor, for himself, or any other person when such work is related to any matter pertaining to the Charter Township of Clinton or which is inspected by the Charter Township of Clinton.*

Smith noted there had been no complaints regarding Santia received by his office during his term as HR Director. There was no record available to indicate Santia had requested a waiver to operate a company which may create such a conflict. It is the opinion of this investigator, and more importantly, HR Director Smith, Santia was clearly in violation of this policy. Notwithstanding this clear policy violation, there was no evidence located which would indicate Santia accepted funds directly from Clinton Township for work done by a company in which he was affiliated. It is possible TEC provided *subcontracted* traffic study work to local developers, which may have provided revenue to Santia. Absent the ability to review all invoices and contractual arrangements of such contractors, this cannot be affirmatively established. Even if TEC had a subcontract with a developer for a traffic study, those costs would have been borne by the developer, and not impacted the revenue or financial situation of Clinton Township.

## Conclusion

No evidence or information was developed during this review which would indicate Santia further harmed the Charter Township of Clinton, notwithstanding the reputational damage due to his and Reynolds' known involvement with Mr. Modi. While a full financial review of vendor invoices was not conducted, the internal controls of the DPCD, most specifically, detailed Board review of applications and any recommendations made by DPCD, acted as an effective brake on any exertion of authority by someone in Santia's position and thereby limited any possible self-enrichment opportunities. It is the opinion of this investigator, these controls remain effective, and absent the conflict of interest discussed above, no additional issues were discovered.

## Recommendations

It is recommended the Charter Township of Clinton give consideration to the establishment of an ethics policy. Such a policy would be in addition to those agreed upon in the collective bargaining

documents. Ethics policies provide an additional deterrent to inappropriate employee behavior and can be used to regularly refresh employees on their responsibility to maintain a high standard of integrity.

## Interviews

**Carol Sobosky**

**Interview:** Carol Sobosky  
Office Manager  
Department of Planning & Community Development  
Charter Township of Clinton

**Interview Date:** October 23, 2018

**Interview Location:** Clinton Township, Michigan

**Phone:** 586.723.8085

**Interviewer:** William J. Kowalski

On October 23, 2018, Ms. Carol Sobosky was contacted at her place of employment in Clinton Township, Michigan. Ms. Sobosky was aware of the purpose of the interview and the identity of the investigator. Ms. Sobosky requested the presence of a union representative at this interview, and the terms were agreed to, providing the union representative only participated in a passive manner and listened on Ms. Sobosky's behalf. Thereafter, Ms. Sobosky provided the following information:

Sobosky indicated she has been employed by the Charter Township of Clinton since 1982 when she started as a part-time, as-needed associate and became a full-time employee in 1989. She has a teaching certificate from Oakland University, and her entire employment at Clinton Township has been in the Planning Department.

Sobosky stated she has held a variety of positions in the Planning Department; first, as an office clerk; then as an office manager working with the Planning Director since approximately 2002. She indicated that Mr. Carlos Santia began in the Planning Department in approximately 2002, where he remained until June of 2018.

Ms. Sobosky was asked to comment on her relationship with Mr. Santia, and she responded that he was the Director of the department, but the two of them were merely co-employees and office workers. She explained that the two of them did not socialize much together.

Ms. Sobosky advised that her regular and routine duties involve answering questions from citizens, making sure the Planning Director has everything he needs to make his reviews regarding site plans, zoning Board of Appeals and incoming applications. Ms. Sobosky characterized her regular workday as fairly mundane, but indicated she knows the importance she plays in the flow of information in Clinton Township.

Ms. Sobosky was asked whether any financial activities occur in Clinton Township for which she has any oversight or responsibility or personal involvement. She noted the Planning Department deals with the Community Development Block Grant ("CDBG") program. This program was described by Ms. Sobosky as indicating that a contractor may do work at a home or location of a low-income resident and, thereafter, the contractor might place a lien on that home for payment for his or her work.

Subsequently, the contractor might submit a request for payment to the Planning Department. The Planning Department also, on occasion, would refund bond money when a construction site was completed. Sobosky indicated Mr. Ed Manninon is the Community Planner. She noted Mr. Manninon and the building inspectors often go out to the sites and inspect when jobs are done by contractors and their approval is needed before any payments are made under the CDBG.

Sobosky defined the Director of the Planning Department's duties as running the department, working with the Board, meeting with developers, and approving site plans prior to their submission to the Board for final approval. She noted that Mr. Santia was, in her opinion, fairly efficient at this job. Sobosky noted she took the minutes for all the board meetings in which Mr. Santia and the board members participated. She further stated that oftentimes, elected officials came into the office of the Planning Director and had personal meetings with Mr. Santia in his office, talking about site developments, zoning issues and other items of interest to their constituents.

Sobosky was asked to describe the tenor in the office or any conversations regarding Mr. Santia or Mr. Reynolds when Mr. Reynolds was indicted by the U.S. Attorney's office in the Eastern District of Michigan. She recalled there was certainly some talk in the office, but it was mostly rumor, as no one knew the full extent of the facts prior to any trials. Sobosky was clear in indicating that she never noticed any close relationship between Mr. Reynolds and Mr. Santia. She was asked whether Mr. Santia's computer in his office was ever reviewed by the FBI, and she indicated she did not believe that computer was ever reviewed by law enforcement. Sobosky did comment that Mr. Santia had a much closer relationship with the full-time board member rather than Trustees, such as Mr. Reynolds. Ms. Sobosky finally admitted she was never talked to or interviewed by the FBI in the conduct of their investigation into the activities of Mr. Reynolds.

Ms. Sobosky was asked whether she had any information regarding Mr. Santia's company, TEC. She noted she was completely unaware, notwithstanding her long relationship with Mr. Santia, that he had an interest in any outside companies such as TEC until she read it in the paper during the litigation.

Ms. Sobosky explained it is routine practice for a site plan to come into the office of Planning Development and her office would then deal with that plan. Once the review is completed by the Planning Department, the site plan would go to the Building Department thereafter. Neither Ms. Sobosky nor she believes the Director, most specifically, Mr. Santia, really would deal with any subcontractors. If, in fact, TEC was a subcontractor for another vendor for Clinton Township, she would not have known that, she would not have any reason to know that, and she would have no interaction with any of the subcontractors. She believes the Building Department would possibly see lists of vendors and invoices from subcontractors, and she identified the individual in the Building Department who may assist in this matter as Mr. Barry Miller.

Sobosky indicated that if a contractor was desirous of a developing property in Clinton Township, it would be their first step in the process to submit a site plan. An assistant director in the Planning Department, who left the department in approximately December of 2017, Mr. Joseph Silbernagle, would check the zoning for the parcel in question, put together a plan and send a memo to the commission with his observations and possible approval or denial recommendation. If rezoning was necessary, there would be a "1200 filing," which involves notifications to any individuals living in and around the prospective development. All rezoning requests would have to go to the Board with the approvals or denials from such filings and notifications attached and noted thereto. Sobosky noted each

memorandum is unique to each specific file. Most of the rezoning requests went forward with Mr. Silbernagle's approval, and it would be a rarity if a rezoning request was not approved. Sobosky indicated there are very specific zoning rules and principles and checks and balances in the system. She was asked whether Mr. Silbernagle or Mr. Santia would ever talk to contractors regarding zoning approvals, and she indicated this would be unlikely, in her opinion. She explained that Mr. Santia and Mr. Silbernagle would often go to the site and would engage with contractors.

Sobosky corrected the investigator at this point in the interview and indicated it would be more precise to refer to the individuals as developers rather than contractors, because the developers of a parcel who would make these requests usually hire contractors to perform the actual labor. Sobosky was asked to provide the ratio of residential requests to business requests, and she could not answer this question. She noted there were only a few parcels of property that are available for new construction, and currently, any of the site planning requests are for rebuilds.

Sobosky was asked to provide any information she could about the firm Giffels Webster. She explained that Giffels Webster ("GW") became the engineering company for Clinton Township. She provided a flow of information by indicating that the Planning Department would do their research and work regarding a site plan, and thereafter it would go to the Engineering Department. Once it left her department, there would be very little interaction with the Engineering Department until things got moving. She was asked whether she was aware of an individual by the name of Paulin Modi in regard to Giffels Webster. Sobosky responded she vaguely recalled the name, but she had no interaction with Mr. Modi. She never saw Mr. Modi meet with Carlos Santia in the office directly, but she cannot be certain whether or not Mr. Santia and Mr. Modi had business interaction. She apologized by indicating she just does not recall the extent of the interaction between Mr. Modi and Mr. Santia.

Ms. Sobosky was asked whether she had kept a calendar for Mr. Santia while he was employed in Clinton Township, and she indicated that she did not, as he maintained that responsibility himself. She did not have any proxy rights to his computer or to his calendar while he was employed at Clinton Township. He made all his own appointments and handled any document review on his computer on his own. She noted Mr. Santia was in and out of the office quite often and would be an individual who she would characterize as an eight-to-fiver in the office. She explained that he was involved in many committees within the Township, and he was always in meetings with other individuals, so he was not difficult to locate.

Ms. Sobosky was asked whether the Charter Township of Clinton maintains an ethics policy and whether she knows where such documentation might exist. She replied by indicating the Human Resource Department under the current direction of Mr. Bill Smith would know about such a policy. She opined that any policy regarding ownership or involvement in a business such as TEC doing business with Clinton Township by an employee would be covered by whatever policy Mr. Smith or the HR Department would be able to provide.

Sobosky commented that she was not aware or did not observe that Mr. Santia had any great power in decisions regarding rezoning. She noted the office within Clinton Township always used the proper procedures, and she cannot imagine a situation where he used his authority or potential approvals or denials in an effort to gain an advantage over a developer or contractor. Ms. Sobosky indicated she had provided a prior email to counsel Jack Dolan, where she had gone through a number of the zoning requests. She identified some of the definitions that were included on this document, which the

investigator indicated he already had in his possession. She noted Mr. Dolan had asked her to go through all the rezoning requests and highlight any questionable ones that may have had an opportunity for Mr. Santia or others to exert any influence over the developers. She advised she furnished this information in a color-coded document to Mr. Dolan and would attempt to retrieve it, if so requested by the investigator.

It was requested of Ms. Sobosky once this document is retained by the investigator, if certain questionable or items that she highlighted as questionable were needed by the investigator, could he obtain the entire file, which would include any approval or denial memoranda from her. She indicated this would be part of the instructions given to her to fully cooperate in this investigation, and if files were necessary, that request can be made and she would answer it.

At this point, the interview was concluded with the understanding that additional conversations with Ms. Sobosky may be required in the future, and she was very amenable to such contact.

#### End of interview

#### Joseph Silbernagle

**Interview:** Joseph Silbernagle  
Former Assistant Director DPCD (retired)  
Charter Township of Clinton  
**Interview Date:** January 7, 2019  
**Interview Location:** Telephonic  
**Phone:** 586.263.5921  
**Interviewer:** William J. Kowalski

On January 7, 2019, Joseph Silbernagle was telephonically interviewed by investigator William Kowalski. Silbernagle was made aware of the identity of the interviewer and that the purpose of the interview was to discuss his prior employment in Clinton Township, and more specifically, his prior supervisor, Mr. Carlos Santia. Silbernagle agreed to this contact and scope and thereafter provided the following information:

Silbernagle was familiar with the circumstances surrounding Santia's departure from Clinton Township. He acknowledged reading the press reports concerning Santi's testimony in the Reynolds matter. Silbernagle indicated he was somewhat surprised by Santia's testimony, as he had never known Santia to be involved with any inappropriate activity while employed by the Township. He never observed Santia to mistreat developers, ask for anything inappropriate, or offer independent services in any discussions with individuals dealing with the DPCD. Silbernagle denied ever engaging in any of this activity personally also.

Silbernagle had quite regular interaction with Santia given their assignments and positions and considered him ethical and competent. He never had any concerns about Santia's behavior on those occasions when they may have gone to sites together, or met with individuals having business with the DPCD. Silbernagle noted, as a supervisor, Santia left him alone to perform his job functions and relied upon Silbernagle's judgement and work ethic when assignments were completed. Silbernagle never

received pressure from Santia to make a certain recommendation on any matters in which he was involved.
